

The United Nations Mission to support the Hudaydah Agreement (UNMHA) has recorded 7 explosive ordnance (EO) related incidents in various districts of the Hudaydah Governorate. Tragically, these incidents have resulted in a total of 9 civilian casualties. Among these casualties, 4 were innocent children, underscoring the devastating impact of these events on the most vulnerable members of society. Three of these children were injured, while sadly, one lost their life. The affected districts include Al-Hali, Al-Hawak, Ad-Durayhimi, Bayt Al Faqih, At-Tuhayta, and Al-Jarrahi.

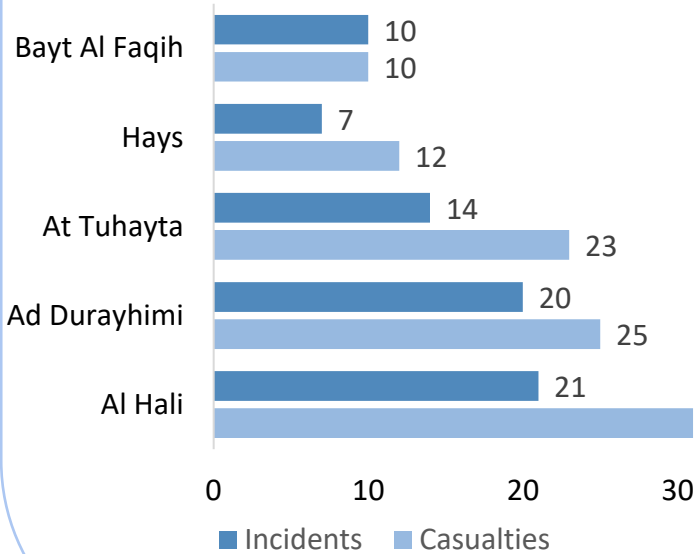

## EO Incidents and Civilian Casualties in Hudaydah from 1 June 2023 to 31 May 2024

More than 4 out of 10 casualties are women and children

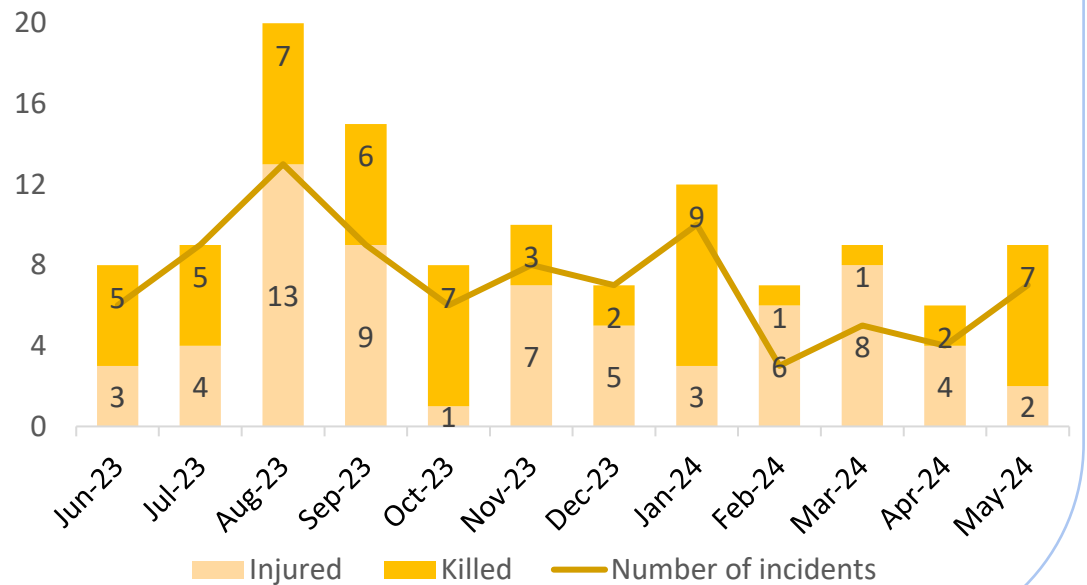

### The most affected districts

(Accumulative since 1 June 2023)

### Number of incidents and casualties per month

Note: numbers in this document are as reported by multiple sources and have not been independently verified by UNMHA.

### Mine Action Activities

The UNMHA Mine Action team has continued to collaborate with local authorities in Hudaydah, Sana'a, and Aden. These engagements extended to partnerships with the UN Resident Coordinator's Office, the United Nations country team, international NGOs and stakeholders, and other regional and global stakeholders. The team conducted 25 mine action activities in the month of May, including coordination and technical support, and advocacy for mine action support in the Hudaydah governorate and the whole of Yemen.

Yemen remains one of the most landmine and explosive remnants war (ERW) contaminated countries in the world and while the UN, under the lead of the Resident/Humanitarian Coordinator's humanitarian mine action advisers is dedicated to see a restructured mine action approach in Yemen and build donor confidence, the country sees incidents happening on a weekly basis.

### EO incidents in May 2024
