

The United Nations Mission to Support the Hudaydah Agreement (UNMHA) has recorded five (05) landmine and explosive remnants of war (ERW) related incidents in the Hudaydah Governorate in March. In these incidents, one (01) woman was injured, two boys (02) and six (06) men were killed. The incidents took place in the Ad Durayhimi, Al Hali, Bayt Al Faqih, and Hays districts, areas that continued to be documented as sites of recurrent landmine and ERW incidents. The increase in both number of incidents and casualties in March compared to February underscores the escalating threat posed by landmines and explosive remnants of war in Hudaydah governorate. This alarming trend highlights the urgent need for enhancing mine action efforts including, clearance, explosive ordnance risk education and victim assistance to protect civilians and prevent further loss of life.

EO Incidents and Civilian Casualties in Hudaydah for March 2025

Mine Action Activities

In March 2025, UNMHA Mine Action Team undertook six (06) activities in support of mine action efforts. These activities included engagements with mine action stakeholders, non-governmental organizations (NGOs), and UN counterparts, and aimed at promoting stronger partnerships and strategic coordination to address the threat posed by landmines and ERW. The Mission continues to monitor demarcation of the confirmed hazardous areas in the three ports of Hudaydah, Ras Issa, and As Salif as per the Mission's mandate. The Mission continues to keep staff in the governorate, on both sides of the frontlines to implement the Mission's mandate and support efforts by the Special Envoy, Resident Coordinator, and the UN agencies, funds, and programmes.
