

Mine Action Update

Impact of Landmines and ERW on Civilians in Hudaydah

Note: numbers in this document are as reported by multiple sources and have not been independently verified by UNMHA.

In September 2023, UNMHA recorded 9 landmine and explosive remnants of war (ERW) incidents, resulting in **15** civilian casualties in the Hudaydah governorate. Casualties were reported in Hays, Ad Durayhimi, Al Hali, Al Hawak, Bayt Al-Faqih and At Tuhayta districts. There was a decline after the spike in August which interrupted the decreasing trend in casualties observed since January. The percentage of children among all casualties remained above 30 percent almost every month.

Mine action advocacy and coordination activities

In September, UNMHA conducted 16 mine action coordination activities with 16 interlocutors including UN partners, local authorities, NGOs, and the private sector on advocacy, resource mobilization, and risk assessment. Fifty-six per cent of these activities involved local authorities and 12 per cent involved UN entities.

% of events per stakeholders

On 10 September, UNMHA visited the YEMAC Mine Detection Dogs (MDDs) training centre in Aden.
